INTRODUCING THE A1200 ARCADE EVOLUTION JOYSTICK

CLASSIC 9-PIN JOYSTICK DEBUTS AT AMIWEST 2026 & AVAILABLE FOR PREORDER

24 October 2026, Sacramento, CA

AmigaKit Ltd is pleased to introduce **Arcade Evolution A1200** - a new micro switched 9-pin joystick for classic retro gaming, making its public debut at AmiWest 2026 in Sacramento.

Featuring a robust steel-shaft arcade joystick and two independent red fire buttons, the Arcade Evolution A1200 combines traditional arcade control with a distinctive A1200-branded enclosure.

The joystick offers selectable rapid-fire and fire-to-jump functions, a moulded 9-pin cable and four sucker feet for stability during play.

Designed for classic Amiga, and other compatible 9-pin systems, the joystick can also be used with the A600GS, A1200GS and A1200NG.

This officially branded **A1200** stick incorporates classic styling to match our computer range.

The joystick can now be ordered on the AmigaKit website for shipping in late November 2026. Visitors to AmiWest can see and try out the new joystick at the AmigaKit stand.

FEATURES

- ✓ Microswitched steel-shaft joystick
- ✓ Rapid-fire & fire-to-jump options
- ✓ Four sucker feet for stability
- ✓ Two independent fire buttons
- ✓ 9-pin plug and moulded cable
